HR Analytics Dashboard Report

1. Introduction

Human Resource Analytics helps organizations analyze employee data to improve workforce management and decision-making.

This project presents an **interactive HR Analytics Dashboard** created using Power BI to visualize employee data and identify key workforce insights.

The dashboard provides information about employee distribution, performance scores, department analysis, gender distribution, and employee status.

2. Objectives

The main objectives of this project are:

- To analyze employee data using data visualization.
- To identify workforce distribution across departments.
- To evaluate employee performance scores.
- To analyze gender distribution in the organization.
- To monitor active and terminated employees.

3. Tools and Technologies Used

- **Power BI** – Dashboard creation and visualization
- **Excel / CSV Dataset** – Data source
- **Data Cleaning & Transformation** – Using Power Query

4. Dataset Description

The dataset contains HR-related employee information such as:

- Employee ID
- Department
- Gender
- State
- Division
- Marital Status
- Performance Score
- Employment Status

This data helps in analyzing workforce demographics and performance.

5. Dashboard Overview

The dashboard includes several key metrics and visualizations.

KPI Cards

- Total Employees: **2651**
- Active Employees: **2152**
- Terminated Employees: **499**
- Average Performance Rating: **2.98**
- These KPIs give a quick overview of the workforce status.

Employee by Department

This chart shows the number of employees in each department such as Production, IT/IS, Software Engineering, Sales, and Administrative Offices.

It helps identify which departments have the largest workforce.

Employees by Gender

The pie chart displays gender distribution in the organization.

- Male: **59%**
- Female: **41%**

This visualization helps analyze gender diversity.

Performance Score

The performance score chart shows employee performance categories:

- Fully Meets
- Exceeds
- Needs Improvement
- PIP (Performance Improvement Plan)

This helps HR understand overall employee performance levels.

Employee by Division

This bar chart shows employee distribution across divisions such as:

- Field Operations
- Engineers
- Aerial
- Wireline Construction
- Project Management

Employee by Marital Status

The donut chart shows employee marital status distribution:

- Single
- Married
- Divorced
- Widowed

6. Filters (Slicers)

The dashboard includes interactive slicers for:

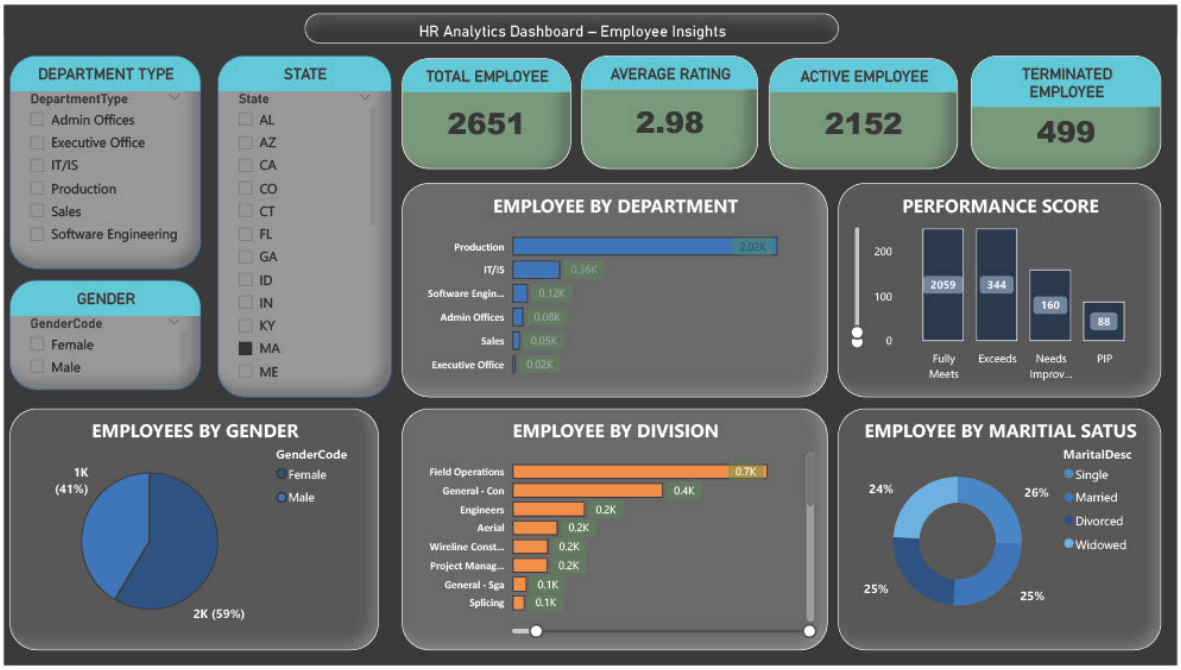
- Department Type
- Gender
- State

These filters allow users to explore the data dynamically.

7. Key Insights

From the dashboard analysis:

- Production department has the highest number of employees.
- Male employees are slightly higher than female employees.
- Most employees fall under the **Fully Meets performance category**.
- Active employees significantly outnumber terminated employees.

8. Conclusion


The HR Analytics Dashboard provides a clear and interactive way to analyze employee data. It helps organizations understand workforce distribution, employee performance, and key HR metrics.
